  SSC Maharstra State Board
  Completed in 2019

About Me

"I'm a third-year computer engineering student with a strong passion for front-end development. In addition, I am the co-founder of NetraX, a pioneering venture in Optical Coherence Tomography. I excel in creating visually appealing and responsive web designs. With a knack for multitasking and problem-solving. I'm a detail-oriented team player known for my strong communication skills, adaptability, and teamwork. I thrive under pressure and am committed to continuous learning, ensuring I stay at the forefront of web development trends."

Projects

NetraX - Marketing Site

"NetraX" is our innovative startup dedicated to Optical Coherence Tomography (OCT). This marketing website serves as a platform to introduce our work, share information about OCT technology, and establish a strong online presence in the medical imaging industry.

Tech Stack :-
- HTML5
- CSS (including Tailwind CSS and Bootstrap)
- JavaScript

Portfolio Site

A simple portfolio website I created to showcases my skills, projects, and contact information.

Tech Stack :-
- HTML5
- CSS

Clones Sites

This project aims to replicate the Razorpay user interface, Discord User Interface & Netflix User Interface functionality while showcasing my skills in front-end development.

Tech Stack :-
- HTML5
- TailwindCSS

Food Delivery Website

During our first year in college, we embarked on a journey to create a simple food delivery website. Please keep in mind that this project was developed as part of our learning experience, and there might be areas that could be improved and modernized.

Tech Stack :-
- HTML5
- CSS, Javascript
